- Humanitarian Workers

What is Trauma Informed Leadership and why is it important?

A trauma informed approach to leadership acknowledges that many people have experienced forms of trauma that require us to provide special attention, compassion, and skill or order to create conditions for them to contribute and thrive in our organizations. Leaders who bring trauma-informed awareness and skills into practice are better able to support people in working through their limits and optimizing their strengths in service of our missions, and of our communities.

“
**Presence
is the place
where the
past is being
alchemized
into now**
”
